REPORT.

GENERAL HEADQUARTERS,

STATE OF MARYLAND,

Adjutant General's Office,

Annapolis, Dec. 31st, 1883.

To his Excellency,

William T. Hamilton,

Governor and Commander-in-Chief :

Sir:—As directed by the militia law, approved April 4th, 1870, I have the honor to submit the report of this department for the years 1882 and 1883, ending January 1st, 1884.

The appropriation for the support of the militia for 1882, was \$13,000, of which amount, \$9,196.50, was expended up to January 1st, 1882, leaving a balance of \$2,803.50, the account of the disbursements of which, will be found in Table C., and vouchers filed in this office; and that for 1883, was \$13,000, and a special appropriation of \$450, for the support of the Williamsport Light Infantry, the account of the disbursements of which, will be found in the Table D., and vouchers filed in this office. For the fiscal year, commencing the 1st of October, 1883, was appropriated \$13,750, and a special appropriation of \$450, for the Williamsport Light Infantry, of which amount, the sum of \$5,978.53, was expended up to January 1st, 1884, leaving a balance for the fiscal year, ending Sept. 30th, 1884, of \$8,086.47, the account of the disbursement of which, will be found in Table E., and vouchers filed in this office.

With these appropriations, it required the strictest economy to keep the force in good working condition, especially so when the Legislature failed to make an appropriation to pay the balance due on account of the Yorktown celebration.

Not wishing to make further application to the Legislature for this purpose, nor to compel the parties to whom

these claims were due, to wait longer for their payment, I made an appeal to the different commands of the militia of the State to assist me to pay these claims by denying themselves of many things which they thought they ought to have, or by supplying them at their own expense, thus enabling me to apply a portion of the appropriation to which each command was entitled to the payment of those claims. To this appeal the different commands responded promptly, and I now have the gratification to report that they are all paid and there is left funds enough on hand to meet all necessary expenses to October next, the commencement of the fiscal year.

To do this I had to dispense with the annual parades for October, 1882, and 1883, which I very much regretted, as I consider, in the absence of an encampment, these annual parades are important, as they furnish an opportunity to the Commander-in-Chief to inspect the different commands at one time and place, and thus know their condition, and to stimulate officers and men to greater exertions in order that they may excel each other in military tactics, and to become better acquainted.

In my last report I stated it was absolutely necessary, in order to bring the State Militia up to such condition, that they would do credit to, as well the State as also themselves, to have them spend a week or ten days in performing camp duty. But to do this would require an appropriation of \$5,000 from the Legislature. The State cannot expect the volunteer soldiers to do this at their own expenses. Some of the States, appreciating the importance of these encampments, not only pay the ordinary expenses incurred, but also pay officers and men for the time they spend in camp. A small amount spent in camp duty is money well spent. Experience has proved that my former recommendation on this subject was correct.

The importance of keeping up a proper militia organization, I do not think can be controverted, and I therefore again call the attention of the Legislature to the fact that the State has no armory to keep what military stores there may, at any time, to be on hand, and hence such stores have to be kept at the armory of the 5th Regiment, and hence I find it impossible to take such care of these goods as is desirable. This ought not to be so, especially as the State now owns the Pikesville Arsenal property, which has been used by the General Gover-

ment for this purpose for many years, and was transferred by it to the State without cost.

If the Legislature will place this property in charge of the Adjutant General for military purposes, (the transfer as was intended by the General Government when making it,) there will be ample room for an armory and State encampment, besides comprising, as it does, some thirteen acres of land, with bulidings every way suitable for a military depot. It can be kept for this purpose without expense to the State, and also a person can be had to take proper care of all military equipments belonging to the State and not in immediate use, and thus much of these might be saved. A full description of this property can be found in my report for 1882.

It is important to know how many able bodied men there are in the State subject to military duty. Some plan should be adopted to enable the Adjutant General to give this information from his department at any time. At present no one knows anything about this, consequently I cannot comply with the law of the United States, which makes it the duty of the State to give this information. The most correct mode would be to have an enrollment every two years, but as this might be objectionable and expensive, I most respectfully suggest that the registers of voters of the different counties, and of the City of Baltimore, be directed to make an annual return to the Adjutant General on or before the first day of December, in which return should be set forth a true copy of the names registered in said counties and city, together with the age, occupation and residence, as also the health of each person represented by such names as far as practicable. A portion of this was made the duty of the registers under the old registration law, but as no penalty was provided, no attention was paid to this portion of his duty. As far as I have been able to ascertain, every State has some mode, provided by law, by which this information can be had.

In Ohio, where the militia force is very large, the assessors perform this duty every two years when the number can be correctly obtained without additional cost.

The plan I suggest, although not as correct as a regular enrollment, yet it will furnish the data which will enable the Adjutant General to form an opinion. Having this information, those liable to military duty could be so classified that if an additional force to the organized com-

panies should be required, they could be called into the service with but little delay. The militia law of the State requires much alteration, or an entire new one could be enacted which would not be irksome to the people, and would increase the number of the militia, if required, as also their efficiency without any additional appropriation from the Treasury. The laws regulating the militia before the war was of such a character that it kept the ranks of the different volunteer militia commands well filled with a much larger force than we have at present, with little or no aid from the State.

The impression prevails, that whenever a sufficient number of men associated themselves for a military company the Adjutant General must muster them into service. This leads to the formation of military organizations not required.

To remove this impression, the law should be so amended as to give the Governor the power, at all times, to accept or refuse to muster any organization that may request to enter the military service of the State.

Having now twenty-four infantry companies, all uniformed and fully equipped, except one, I consider that we have sufficient of this arm of the service to render such aid to the civil authorities as may, at any time, be required.

In addition to these, I have organized three colored companies, two of which have been fully equipped without any expense to the State.

As I stated in my last report, we do require two first class companies to be located in Baltimore City, or its vicinity—which would be of great value in case of actual service—one of cavalry and a battery or part of a battery of artillery: and I am satisfied, had the appropriation for the last two years been made in the usual way, I could now have had two such companies formed, as we have about enough now due the State from the United States, out of the appropriation which is annually made by the General Government for the purposes of supplying the States with arms for their militia.

Not having drawn last year but one hundred and fifty rifles, 45 calibre, for the purpose of supplying the Second Battalion, head-quarters located in Cumberland, and cartridges, for the use of the different commands, leaving \$1,100 yet due, and add to which what may be due the State for this year, will make enough to equip one

good company of artillery, and with what is now on hand, also a company of cavalry. There having been no artillery in the service of the State since 1877, and no equipments of any sort for such a company, and believing it to be important, that a portion of the State Militia should consist of this arm of defence, I have been as careful as possible with the supplies from the General Government in order that this object might be accomplished, which I now have no doubt can be done without any extra appropriation, provided the Legislature gives the Governor the power to use the appropriation for the support of the militia as in his judgment as Commander-in-Chief, he may think best. This I think has always been the mode except last year, which latter experience has proved to me is not the proper mode. The Governor should have as much power over the funds to support the militia as he has over the militia themselves. I have no doubt that an annual appropriation of \$13,000, will then keep the number of companies now in existence in good condition, supplying all their necessary wants, and with the appropriation of the General Government, equip and sustain the two companies to which I refer. In the importance of this, I think all military men will concur. This amount will allow one annual parade of all the volunteers at one time and place. But if the Legislature should consider an annual encampment as important as I do, it will then be necessary to appropriate the further sum of \$5,000 for that purpose.

There is at present no law regulating the uniforms to be worn by the militia of the State, consequently every command adopts one according to their own taste. This ought not to be, as it adds greatly to the beauty of a large body of troops to have them all in the same uniform.

This can be done by passing an act describing the State uniform and directing the companies hereafter formed to conform thereto.

Since my last report I have disbanded two companies of cavalry. After examining their condition I found it was not possible for them to be of any service to the State if they should be called upon. I therefore thought it useless to continue them. I have collected a considerable portion of the equipments belonging to the State from one of these companies, the other I have not been able to collect from, although I have made frequent calls on the Captain for this purpose.

Reverting to the matter of enrollment, I wish to add that it encouraged volunteers as it did when a law for this purpose was in existence.

It is well known that before the war the militia force of the State was much larger than now, when officers and men had to furnish their own uniforms and to meet all other expenses attending their organization, the State furnishing nothing but the arms.

Baltimore City, with a population much less than at present, had two regiments of infantry, one of rifles, one of cavalry and two full companies of artillery. Now, with a population of about 450,000, it has but one regiment of infantry.

The Adjutant General should be empowered by law, upon the order of the Governor, to dispose of such military stores as may have become useless.

J. WESLEY WATKINS,

Maj. General and Adjutant General of Maryland.

APPENDICES

Accompanying the Report of the Adjutant General.

- A.—Register of Military Force of Maryland.
 - B.—Showing Strength of the Maryland National Guard at the close of the year, December 31st, 1883.

ENLISTED MEN.

No.	NAME.	RANK.	REMARKS.
1	D. W. Crowther...	1st Sergeant...	The Company has had five parades during the year, including the trip to Frederick and Chambersburg, Pa. The drill-meetings have not been regular and the attendance has been meagre. The arms are distributed among the men, and receipted for to the proper officers. The failure of our encampment, because of half-hearted support and want of encouragement from sources most expected, has increased the indifference and want of interest on the part of the men, which it will take sometime to counteract.
